NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

March 31, 2016 and 2017

NOTE 1 | FRAMEWORK FOR PREPARING THE CONSOLIDATED STATEMENTS

(I) Basis of presentation

The accompanying consolidated financial statements of Odakyu Electric Railway Co., Ltd. (the "Company") and consolidated subsidiaries (together, the "Group") are prepared on the basis of accounting principles generally accepted in Japan, which differ in certain respects as to the application and disclosure requirements of International Financial Reporting Standards, and have been compiled from the consolidated financial statements prepared by the Company as required by the Financial Instruments and Exchange Act of Japan.

(2) U.S. dollar amounts

The Company and its domestic consolidated subsidiaries and affiliates maintain their books of account and other records in yen. The U.S. dollar amounts are included solely for convenience and are stated as a matter of arithmetical computation only at U.S.\$1.00=¥111.34, the approximate exchange rate prevailing on March 31, 2017. This translation should not be construed as a representation that the yen amounts actually represent, or have been, or could be, converted into U.S. dollars at the above or any other rate.

NOTE 2 | BASIS OF PREPARATION OF THE CONSOLIDATED FINANCIAL STATEMENTS

(I) Scope of consolidation

(a) Number of consolidated subsidiaries: 44 Primary consolidated subsidiaries include Odakyu Department Store Co., Ltd., Odakyu Shoji Co., Ltd. and Odakyu Real Estate Co., Ltd.

Odakyu Life Associate Co., Ltd. has been excluded from the scope of consolidation because the sale of its stock resulted in the loss of its status as a subsidiary on July 1, 2016. The statements of income of the company were consolidated until exclusion from the scope of consolidation.

Okinawa UDS Co., Ltd. was established on October 3, 2016, and has been included in the scope of consolidation from the fiscal year ended March 31, 2017.

(b) Name of major non-consolidated subsidiaries Fuji Oyama Golf Club Co., Ltd.

The non-consolidated subsidiaries are all small in scale and not material when measured by the impact of total amounts of assets, net sales, net income attributable to owners of the parent, and retained earnings (based on the Company's ownership percentage) of these companies in the consolidated financial statements. They have therefore been excluded from the scope of consolidation.

(2) Application of the equity method

(a) Number of affiliates accounted for under the equity method: 2 Kanagawa Chuo Kotsu Co., Ltd. and Shirohato Co., Ltd.

Shirohato Co., Ltd. has been accounted for under the equity method from the fiscal year ended March 31, 2017 as a result of acquisition of its shares in November 2016.

(b) Oyama Kanko Dentetsu Co., Ltd. and other non-consolidated subsidiaries and other affiliated company have not been accounted for under the equity method because the impact of net income and retained earnings (based on the Company's ownership percentage) of these companies are all small amounts and not material proportionate to the net income attributable to owners of the parent and consolidated retained earnings.

(c) Of the affiliates accounted for under the equity method, the fiscal year end date of Shirohato Co., Ltd. is different from the consolidated fiscal year end date. In preparing the consolidated financial statements, the Company uses the financial statements of Shirohato's fiscal year end date.

(3) Fiscal year-end of consolidated subsidiaries

The fiscal year-end of seven consolidated subsidiaries differs from that of the Company. The fiscal year-end of UDS Co., Ltd. and Okinawa UDS Co., Ltd. is the end of December, and that of Odakyu Department Store Co., Ltd., Odakyu Shoji Co., Ltd., Odakyu Shokuhin Co., Ltd., Hokuo Tokyo Co., Ltd. and Odakyu Department Service Co., Ltd. is the end of February. The financial statements of these subsidiaries have been consolidated with appropriate adjustments for the intervening transactions and events between the end of the fiscal years of these subsidiaries and the end of the consolidated fiscal year.

(4) Summary of significant account policies

- (a) Valuation standards and methods for significant assets
 - (I) Securities
 - ① Held-to-maturity debt securities

Held-to-maturity debt securities are stated at amortized cost (straight-line method).

2 Other securities

Marketable available-for-sale securities

Marketable available-for-sale securities are stated at market value based on market prices, etc. (unrealized valuation gains or losses are calculated by directly charged or credited method to net assets, while the cost of securities sold is calculated by the moving average method).

Non-marketable available-for-sale securities Non-marketable available-for-sale securities are stated at cost using moving average method.

The Company records investments in limited liability investment partnerships, which are deemed "investments securities" under the provisions set forth in Article 2-2 of the Financial Instruments and Exchange Act of Japan, at the amount

equivalent to its own percentage in the assets of such partnerships, based on the most recent financial statements available depending on the report date stipulated in the partnership agreement.

(II) Inventories

Inventories are stated at cost using (the balance-sheet value is calculated reflecting the write-down due to a decline in profitability).

Real estate development for sale,

work in process......The identified cost method

Other inventories......Principally, the retail cost method

- (b) Depreciation and amortization methods for significant depreciable assets
 - (I) Property and equipment (excluding lease assets)
 Property and equipment is stated generally at cost. Depreciation is calculated primarily by the declining-balance method except for buildings (excluding ancillary facilities) for which depreciation is calculated principally based on the straight-line method.

(II) Intangible fixed assets (excluding lease assets) Intangible assets are amortized by the straight-line method.

Software for internal use is amortized by the straight-line method over their estimated internal useful lives (five years for the cost of software).

(III) Lease assets

Lease assets pertaining to finance lease transactions other than those where leases are deemed to transfer ownership of leased property to the lessee are valued by the straight-line method with the zero residual value over the term of the lease, which is deemed the useful life.

(c) Accounting standards for significant allowances and provisions (I) Allowance for doubtful accounts An allowance for doubtful accounts is provided based on the Company's and its consolidated subsidiaries' historical experience with respect to write-offs and based on an estimate

of the amount of specific uncollectible accounts.

(II) Provision for bonuses

The Company provides for allowance for bonus based on the estimated amount of the payment for employees.

(III) Allowance for unredeemed gift certificates and others The Company books expected use of unredeemed gift certificates and travel coupons, etc., to an allowance for unredeemed gift certificates and coupons, etc. (d) Method of railway business construction fund The Group receives a portion of the construction costs applicable to work undertaken to elevate railway lines and crossings and for the improvement of grade crossings in the form of a construction fund provided by local and other public authorities.

Upon completion of construction, an amount equivalent to the construction fund is recorded as a deduction from the acquisition costs of the property and equipment purchased.

In addition, the construction fund portion received is recorded in extraordinary income as "gain on railway business construction fund" in the consolidated statements of income. The corresponding amount recorded as a deduction from the acquisition costs of property and equipment purchased is posted to extraordinary losses in the accompanying consolidated statements of income.

- (e) Method of accounting for retirement benefits
 - (I) Attribution of estimated retirement benefits

 To calculate benefit liabilities, the estimated amount of retirement benefits is attributed to the consolidated fiscal year based on the straight-line attribution method.
 - (II) Treatment of unrecognized actuarial differences and past service costs

Past service costs are posted in expenses based on the straightline method for a fixed period of years (10 years) within the average remaining service years of employees when costs accrue from their service.

Actuarial differences are posted in expenses after the consolidated fiscal year following their accruals based on the declining-balance method for a fixed period of years (10 years) within the average remaining service years of employees.

- (f) Accounting standards for revenue and expenses
 - (I) Finance lease revenue

Finance lease revenue and related expenses of revenue are recorded when the lease payment is received.

(II) Completed construction

With regard to the accounting standard for construction revenue and construction costs, the percentage-of-completion method (the rate of completion of a construction project is estimated using the cost-comparison method) is applied to a construction work if the outcome of the construction activity is deemed certain for the progress made by the end of the year otherwise the completed-contract method is applied.

- (g) Principal methods of hedge accounting
 - (I) Method of hedge accounting

Hedging activities are principally accounted for under the deferral hedge accounting. Exceptional accounting is applied for interest-rate swaps that meet their respective requirements.

- (II) Hedging instruments and hedged items
 - ① Hedging instruments: Interest-rate swap agreements
 - 2 Hedged items: Interest expense on borrowings

(III) Hedge policy

The derivative transactions are executed in accordance with the resolution of the Fund Handling Department upon receiving approval from the individual responsible for settlements.

(IV) Method for evaluation of hedge effectiveness
The Company evaluates hedge effectiveness by comparing the cumulative changes in cash flows or changes in the fair value of the hedged items, and the cumulative changes in cash flows or the changes in fair value of hedging instruments during the period from commencement of hedging to the point of evaluating effectiveness, based on changes in both amount and others. As for interest-rate swap agreements meeting the requirement for certain hedging criteria, the evaluation of hedge effectiveness is omitted as changes in the cash flow from fluctuation in interest rates are expected to be completely offset.

- (h) Method and term of amortization of goodwill Goodwill is amortized over period of mainly five years on a straight-line basis.
- (i) Scope of cash and cash equivalents in the consolidated statements of cash flows

 Cash and cash equivalents consist of cash on hand, demand deposits, and short-term, highly liquid investments with maturities of three months and minimal risk of change in value.
- (j) Other basic significant matters for preparation of consolidated financial statements(I) Accounting for consumption taxesAccounting for consumption tax is based on the tax

exclusion method.

(II) Method of including interest expenses in acquisition cost Interest expenses related to certain long-term and large-scale real estate development for sale are included in acquisition cost. There are no transactions to be applied in the fiscal year ended March 31, 2017.

NOTE 3 | CHANGES IN ACCOUNTING POLICIES

Application of Practical Solution on a Change in Depreciation Method Due to Tax Reform 2016

Following the revision to the Corporation Tax Act, the Company and its certain domestic subsidiaries have applied the "Practical Solution on a Change in Depreciation Method Due to Tax Reform 2016" (ASBJ PITF No. 32, June 17, 2016), and changed the depreciation method for facilities

attached to buildings and structures acquired on or after April 1,2016 from the declining balance method to the straight line method.

The effect of this on the consolidated financial results is immaterial.

NOTE 4 | CHANGES IN PRESENTATION METHODS

Consolidated Statements of Income

"Compensation for transfer" under "Non-Operating Expenses" in the previous consolidated fiscal year became less than 10% of the total amount of "Non-Operating Expenses" and thus is included in "Miscellaneous expenses" under "Non-Operating Expenses." Figures for the year ended March 31, 2016 are reclassified to reflect this change in presentation method.

As a result, ¥1,873 million presented in "Compensation for transfer" under "Non-Operating Expenses" in the previous consolidated fiscal year has been reclassified in "Miscellaneous expenses."

NOTE 5 | ADDITIONAL INFORMATION

Application of Revised Implementation Guidance on Recoverability of Deferred Tax Assets

The "Revised Implementation Guidance on Recoverability of

Deferred Tax Assets" (ASBJ Guidance No. 26, March 28, 2016) has been applied from the fiscal year ended March 31, 2017.

(b) Background to the recognition of a loss on impairment of fixed assets The fixed assets groups that are no longer expected earnings as initial projected or for which a decision for dismantlement has been taken, are recognized as a loss on impairment of fixed assets.

(c) Method of grouping assets

The Group bases its grouping for assessing impairment losses on its business segments or on an individual property and store basis.

(d) Method of determining the recoverable value The recoverable values of assets are measured at their estimated selling value, which is principally equivalent to the valuation submitted by real estate appraisers. When the recoverable values are measured at their value in use, a discount rate of 4.0% is used for the computation of present value of future cash flows for the assets.

(3) Sub-lease transaction

With regard to sub-lease transaction, due to little material significance, information concerning finance lease transactions is omitted.

NOTE 12 | FINANCIAL INSTRUMENTS

(I) Matters regarding the conditions of financial instruments

(a) Policies on financial instruments

It is the policy of the Group to limit its fund management to safe and highly liquid deposits while raising funds primarily through loans from financial institutions and the issuance of corporate bonds in view of the market climate and interest-rate trends. Derivatives are utilized for hedging against the risks described below, not for speculative purposes.

(b) Qualitative information (risks and risk management system) on financial instruments

Trade receivables, which are operating receivables, are exposed to credit risk of customers. In regard to the credit risk, the business management departments of each business unit periodically monitor the status of collection of trade receivables by each customer, manage due dates and balances of trade receivables, and identify and mitigate the default risk of customers at an early stage.

Investment securities are mainly equities acquired in connection with business and are exposed to volatility risks of their market prices. The monitored fair values are reported periodically to the Board of Directors.

Accounts payable, which are operating liabilities, are mostly due within one year.

Borrowings and corporate bonds are intended to procure funds necessary mainly for capital investments and working capital. Borrowings with floating interest rates are exposed to interest-rate fluctuation risk. The long-term portions of borrowings are utilized as derivative transactions (interest-rate swaps) to hedge the risks. These derivative transactions are utilized for every individual agreement to convert variable interest rates on borrowings to fixed interest rates. As for interest-rate swap agreements meeting certain hedging criteria, the evaluation of hedge effectiveness is omitted.

In addition, the borrowings and account payable are exposed to liquidity risks. The Group manages liquidity risks in such a manner that each group company makes and updates its cash flow management plan on a monthly basis.

(c) Supplemental information on fair values

The fair values of financial instruments are calculated based on market prices, or by using reasonable estimates when market prices are no available. These estimates include variable factors, and are subject to fluctuation due to changes in the underlying assumptions. The contract amounts of the derivatives discussed in Note 14, "Derivative Financial Instruments" below are not an indicator of the market risk associated with derivative transactions.

(2) Matters regarding fair values of financial instruments

Book value, fair value and the differences between them as of the end of the previous fiscal year and fiscal year under review are as shown below. (It excludes those whose fair values were difficult to determine. Please see Note 2.)

^{*1.} Corporate bonds include its redemptions due within one year.

^{*2.} Long-term loans include a current portion of long-term debts.

^{*3.} Long-term liabilities incurred for purchase of railway transport facilities includes its repayments due within one year.

Note 1. Calculation method of fair values of financial instruments

- (1) Cash and time deposits and (2) Notes and accounts receivable The book values of cash and time deposits and trade receivables approximate fair value because of their short maturities.
- (3) Investment securities
 - The fair values of stocks are determined using the quoted price at the stock exchange, while the fair values of receivables are determined using the quoted price at the stock exchange or the quoted price obtained from the financial institutions. Regarding notes to securities according to holding purposes, refer to Note 13, "Securities."
- (4) Notes and accounts payable and (5) short-term loans The book values of accounts payable and short-term loans approximate fair value because of their short maturities.
- (6) Corporate bonds
 The fair value of corporate bonds is based on the quoted market price.
- (7) Long-term loans For long-term loans, fair value is determined by discounting

- the total amount of principal and interest at the assumed interest rate on new loans of the same type. Long-term loans with floating interest rates are subject to interest-rate swap exceptional procedures, and, therefore, the fair value is determined by discounting the total amount of interest and principal together with the interest-rate swap at the interest rate assumed in a reasonable manner for new loans of the same type.
- (8) Long-term liabilities incurred for purchase of railway transport facilities
 - The book value of long-term liabilities incurred for purchase of railway transport facilities approximates fair value because the fair values of floating-rate long-term debts reflect market interest rates within a short period of time.
- (9) Derivatives
 - Please see Note 14, "Derivative Financial Instruments," for information on derivative transactions.

The description on the net gain (loss) on sale of other marketable securities is omitted because it is immaterial.

(4) Impairment losses on marketable securities

Impairment losses on marketable securities are omitted because they are immaterial.

The Group records an impairment loss on marketable securities if their market value declines by 50% or more below their respective book value. For securities whose market value has declined by more than 30% but less than 50% below the book value, the Group considers the possibility of recovery and records the amount expected to be unrecoverable as an impairment.

- Notes: 1. The amount posted in the consolidated balance sheet is calculated by deducting the accumulated depreciation and amortization, and the accumulated loss on impairment of fixed assets from the acquisition cost.
 - 2. For the year ended March 31, 2016, the main component of the increase is ¥6,559 million due to the factor that some of facilities that have been leased between the consolidated companies were leased out externally, and the decrease was due to depreciation and amortization. For the year ended March 31, 2017, the main factors attributable to the increase are ¥8,564 million (\$76,918 thousand) due to acquisition of land and building in front of Machida station and ¥3,608 million (\$32,401 thousand) due to acquisition of land and building in front of Shinyurigaoka station.
 - 3. The market value as of end of the fiscal year is based, for main properties, on a real estate survey report prepared by a certified real estate appraiser, and for other properties, on appraised value or price index considered to reflect the fair value.

NOTE 18 | SEGMENT INFORMATION

(I) Segment information

(a) Overview of the reportable segments

The Group's reportable segments are determined on the basis that separate financial information for such segments is available and examined periodically by the Board of Directors, which makes decisions regarding the allocation of management resources and assesses the business performances of such segments.

The Group's businesses provide goods and services that support our customers' daily lives primarily along the Odakyu lines, centered on transportation but including merchandising, real estate, hotel, restaurant and other services.

For this reason, the Group consists of business segments with the business department as the basis. The three reportable segments are "transportation," "merchandising," and "real estate." The main goods and services that fall under these reportable segments are listed below.

Transportation...Railway, bus, taxi, sightseeing boat, ropeway, etc. Merchandising...Department store, supermarket, etc. Real estate.......Sale of land and buildings, leasing of buildings, etc.

(b) Valuation method for reportable operating income (loss) and asset amounts

The accounting method for reportable business segments is presented in accordance with "Summary of Significant Accounting Policies" in Note 2. The reportable operating income figures are based on operating income. Intersegment transactions are presented based on the current market prices at the time of this report.
