# MANAGEMENT'S DISCUSSION AND ANALYSIS

Years ended March 31, 2016 and 2017

## Results of Operations

During the fiscal year ended March 31, 2017, the Japanese economy continued to experience a gradual recovery on the whole, mainly due to a steady improvement in corporate earnings, employment and personal income despite sluggish personal consumption. However, the outlook of the economy remained uncertain, reflecting mainly ongoing uncertainty in the global economy.

Against this backdrop, although the Odakyu Group carried out aggressive marketing, consolidated revenue from operations edged down ¥6,780 million (or 1.3%) from the previous fiscal year, to ¥523,032 million reflecting lower sales mainly in the Merchandising and Real Estate, and other segments. Consequently, operating income declined ¥2,988 million (or 5.6%) to ¥49,947 million, while ordinary income rose ¥944 million (or 2.1%) to ¥46,639 million due mainly to an improvement in non-operating income and expenses. Conversely, net income attributable to owners of the parent totaled ¥26,068 million, down ¥1,430 million (or 5.2%) year on year, due mainly to a drop in extraordinary income and an increase in extraordinary losses.

## Cash Flows

The Odakyu Group undertakes continuous capital expenditures in its railway business and each of its other businesses. These expenditures aim mainly to provide comfortable and speedy railway services and enhance the attractiveness of areas along the Odakyu lines.

We also take an active approach to implement appropriate safety measures and prevent accidents. In the fiscal year ended March 31, 2017, capital expenditures including the investment amount in intangible assets amounted to ¥74,805 million, up 25.5% from the previous fiscal year.

Capital expenditures in the Transportation segment totaled ¥34,547 million, which was used primarily for railway operations. To maximize the effects of our augmented passenger-carrying capacity, we launched the construction of multiple double tracks between Higashi-Kitazawa and Izumi-Tamagawa stations. The project received ¥4,672 million, including ¥3,274 million for a Japan Railway Construction, Transport and Technology Agency project.

In the Merchandising segment, the Group invested ¥3,364 million, primarily to renovate existing stores and construct new locations.

The Real Estate segment spent ¥31,287 million, mainly for the construction of new buildings for lease and refurbishment of existing ones and the acquisition of land and buildings in front of Machida station by the Company.

The Other Businesses segment was allocated ¥5,637 million, primarily for the renovation of the Hyatt Regency Tokyo.

The Group takes a comprehensive view of the market environment and interest rate changes before selectively determining fundraising methods for capital investment in its railway business. These include the use of funding schemes from the Development Bank of Japan Inc. as well as the issuance of corporate bonds and borrowing from private-sector financial institutions. For the construction of multiple double tracks currently in progress, the Company utilizes public subsidy programs, such as the Special Reserve for the Expansion of Railway Transport Facilities and the Private Railway Method from the Japan Railway Construction, Transport and Technology Agency.

To boost the efficiency of fundraising across the board, the Group has introduced a cash management system (CMS). When funds are needed over the short term due to cash flow fluctuations, the Group uses its internal CMS funds to the greatest possible extent and also issues commercial paper.

As the Group generates daily revenue, primarily in its railway and merchandising businesses, it is possible to maintain a sufficient level of liquidity. This capital is utilized effectively within the Group thanks to centralized management based on the CMS.

## Financial Position

Total assets at March 31, 2017 stood at ¥1,270,102 million, representing an increase of ¥12,770 million from a year ago. This was attributable mainly to a rise in property and equipment reflecting the acquisition of rental properties. Liabilities fell ¥8,910 million, to ¥931,399 million, due mainly to a decrease in interest-bearing debt.

Net assets including non-controlling interests rose ¥21,680 million from the end of the previous fiscal year, to ¥338,703 million due to growth in retained earnings as a result of posting net income attributable to owners of the parent.

## Critical Accounting Policies and Estimates

The Odakyu Group's consolidated financial statements are prepared in conformity with accounting practices generally accepted in Japan. The preparation of these financial statements requires the use of estimates by management, which affects the reported amounts of assets and liabilities as of the date of the consolidated financial statements and the reported amounts of revenues and expenses for the period presented. These estimates are based on rational judgments taking the historical results and circumstances into consideration. Because such estimates involve particular uncertainties, the actual results may differ. Critical accounting policies and estimates are included in the following paragraphs. Forward-looking statements contained in this section are based on determinations made by the Group at the date of this report.

### (1) Valuation of Inventories

The Odakyu Group retains a large volume of inventory and has adopted "Accounting Standard for Measurement of Inventories" (Accounting Standards Board of Japan (ASBJ) Statement No. 9 issued on September 26, 2008). Additionally, the Company records land acquired for the construction of multiple double tracks as fixed assets. If it is determined that this land can be used for subdivided housing after completion of the multiple double tracks, the land is reclassified as inventory and the valuation is determined in the same manner as explained above.

### (2) Impairment of Securities

The Odakyu Group holds securities issued by various financial institutions and business partners. The Group records an impairment on marketable securities if their market value declines by 50% or more below their respective carrying value. For securities whose market value has declined by more than 30% but less than 50% below the carrying value, the Group considers the possibility of recovery and records the amount expected to be unrecoverable as an impairment. There is a risk that market prices of these

securities could fluctuate and the Group could thus incur a loss on these securities.

### **(3) Impairment of Fixed Assets**

The Odakyu Group owns numerous fixed assets. The recoverable value of these assets is calculated based on multiple assumptions such as future cash flows, the discount rate, and the residual net sale value. Therefore, changes to any of these assumptions could result in a loss on impairment of fixed assets.

### **(4) Deferred Tax Assets**

The Odakyu Group recognizes a valuation allowance to reduce deferred tax assets to their highly probable realizable value. Taxable income for future fiscal years is considered in determining the appropriate valuation allowance. However, in the event that the anticipated future taxable income declines or increases due to a change in future business results, it could become necessary to revise the valuation allowance accordingly.

### **(5) Retirement Benefit Obligations and Costs**

Calculation of obligations and costs arising from retirement benefits is based on actuarial assumptions. These assumptions include the discount rate, retirement ratio, mortality rate, and long-term rate of return on pension plan assets. However, any difference between the actual results and the assumptions or a change in those assumptions could have an impact on the stated obligations and costs arising from retirement benefits.

## **Takeover Defense Measures**

The Company has adopted a policy regarding mass purchases of the Company's shares (a takeover defense plan), based on the belief that the party which controls the Company's financial and business policy decisions must be one that has a thorough understanding of the Company's financial and business conditions and undertakings as well as the sources of its corporate value as well as an ability to safeguard and enhance the corporate value and common interests of shareholders on a continuing and sustainable basis.

For more details on the plan, please read the press release issued on May 20, 2015 titled "Continuation of Takeover Defense Policy Regarding Mass Purchases of Company Shares (Takeover Defense Plan)," available at <http://www.odakyu.jp/ir/index.html> (in Japanese only).

## **Dividend Policy**

Internal reserves have been invested in important and growing fields to further improve business performance, and dividends will be provided in a stable and continuous manner, targeting a consolidated dividend payout ratio of 30% based on the principle of distribution of returns in accordance with consolidated operating results.

The Company intends to continue its policy of making two dividend payments each year, at the end of the first half of the fiscal year and at the end of the fiscal year. The dividend from the capital surplus for shareholders during a fiscal year is stipulated in the articles of incorporation, according to which the Company can provide the interim dividend by a resolution of the Board of Directors in addition to the dividend by resolution at the general meeting of shareholders.

Based on this policy, the Company paid a year-end dividend of ¥10.0 per share for the fiscal year ended March 31, 2017 and an interim dividend of ¥4.5 per share. On October 1, 2016, the Company implemented a one-for-two consolidation of its common stock. The annual dividend per share for the fiscal year ended March 31, 2017, recalculated to reflect the share consolidation, was ¥19, including an interim dividend of ¥9.0.

## **Business and Other Risks**

A risk management structure for the entire Odakyu Group has been in place based on the Odakyu Group Risk Management Policy. Risks with potentially material impact on corporate management are referred to the Group, which in turn conducts further reviews and creates and undertakes measures to circumvent such risks. The following risks have been identified by the Group as major risk factors that could significantly impact the investment decisions of investors.

Forward-looking statements contained below are based on the information available to the Odakyu Group at the time of submission of this report. Please note that the following does not cover all the risks with potential impact on the Group.

### **(1) Disasters**

#### **(a) Large-Scale Earthquake and Tsunami**

The Odakyu Group's businesses are concentrated in Tokyo and Kanagawa prefectures primarily along the Odakyu lines. In the event of a large-scale earthquake or other natural calamities causing direct damages of its premises and equipment as well as indirect damages such as constraints to business activities due to electric power shortage and lower revenues due to a downturn in consumer confidence, the Group's business results could be adversely affected. It should be noted that a part of the geographical territory where the Group operates is located in the zone designated as an area requiring the implementation of enhanced earthquake preparatory measures with respect to the Tokai region.

#### **(b) Natural Disasters**

The Odakyu Group has implemented a range of measures to anticipate potential natural disasters, such as torrential rains and windstorms. However, in the event of a large-scale natural disaster that causes direct damage to the Group's personnel, premises and equipment or leads to an increase in costs due to the restoration of damaged premises and equipment, as well as reduces the earnings reflecting mainly a drop in consumer confidence due to the probability of the occurrence, the Group's results of operations and financial conditions could be adversely affected.

#### **(c) Outbreaks of Infectious Diseases**

The Group has managed a large number of facilities for customers of its railway, bus and commercial institutions. If a massive infectious disease epidemic such as swine influenza should occur in the Group's business area, it would be feared that this causes customers to refrain from utilizing its facilities, or even result in its operations being unable to continue, particularly its railway operations. Such a situation may have an impact on the Group's results of operations and financial conditions.

## (2) Accidents

### (a) Occurrence of Accidents

The Odakyu Group has put in place a number of measures to ensure the safety of its transport services and food items, and to prevent fire in its buildings and other facilities. However, in the event of a large-scale accident or a fire caused by human error, malfunctioning of equipment or an act of terrorism, these could result in human damage and disruption of the Group's operations, as well as expenses incurred to compensate for damages to victims and to reconstruct damaged buildings and facilities, and these could reduce customers' trust in the Group and impair the Group's image in society. Such a situation may have an impact on the Group's results of operations and financial conditions.

### (b) Defects/Flaws in the Group's Assets and Merchandise

If a defect or flaw is discovered in assets held by the Group, or if it is found that these assets have the potential to cause an adverse effect on human health or the surrounding environment, the Group may incur expenses to rectify the situation, restore conditions to their original status or compensate for damage. If a defect or flaw is discovered in a product sold by the Group, expenses incurred to rectify the situation or compensate for damage, as well as reduced trust in the Group, may adversely affect earnings and financial conditions of the Group.

### (c) Disruption of Information Systems

The Group relies heavily on information systems, such as computer systems and communication networks, in its operations. As such, the Group has undertaken necessary measures to ensure the steady operation of the systems and networks that are critical for its operations. However, in the event of a major disruption of its information systems due to a computer virus or other acts of third-party sabotage, a natural disaster or a human error may have an adverse effect on the financial conditions.

## (3) Corporate Social Responsibility

### (a) Compliance

The Odakyu Group defines compliance as a system of thought and initiatives to comply with rules, including laws and regulations, internal rules and social conventions and to carry out business activities with integrity, and the Group promotes such compliance. However, in the event of an act in violation of compliance that undermines social trust in the Group, the resulting social sanctions may have an adverse effect on the Group's results of operations and financial conditions.

### (b) Management of Personal Information

The Group operates credit card business and holds customer-related and other personal information in conjunction with the credit card and other operations. Although stringent control over personal information is in place, any improper disclosure of personal information for whatever reason could result in compensation claims and tarnish its reputation with potential impact on the Group's operating results.

### (c) Disclosure

The Odakyu Group has undertaken appropriate disclosure on a timely basis by bolstering and conducting internal control in

accordance with the characteristics of its respective operations.

However, in the event of an inappropriate disclosure due to human errors or other reasons, the resulting decline in customers' trust and the damage to the Group's image in society could adversely affect the Group's results of operations and financial conditions.

## (4) Business Environment

### (a) Securing of Human Resources

Many of the Odakyu Group's operations are labor intensive, and it is vital for the Group to secure capable human resources for its workforce. As such, the Group seeks to secure and nurture qualified human resources and ensure that its working environment is a healthy and worker-friendly one. However, in the event of a failure to realize these goals, the Group's results of operations and financial conditions could be adversely affected.

### (b) Legal Restrictions

The Group's operations are subject to various laws and ordinances, including the Railway Business Act, the Road Transportation Act, the Act on the Measures by Large-Scale Retail Stores for Preservation of Living Environment and the Construction Standards Act, and regulations including the Emission Standards, among others. A change in these laws, ordinances and regulations in general or changes applicable to Tokyo and Kanagawa prefectures in particular could affect the Group's results of operations and financial conditions.

The Group's railway operations are governed by fare restrictions described below.

A railway business operator is required by law to obtain approval of the Minister of Land, Infrastructure, Transport and Tourism when it wishes to set forth or change the upper limits of its passenger fares (Article 16, Section 1 of the Railway Business Act).

A railway business operator may set forth or change passenger fares within such approved upper limits or add-on charges for express trains and others, provided that advance filing is made to the said Minister (Article 16, Sections 3 and 4 of the Railway Business Act).

### (c) Interest Rate Fluctuations

The Group undertakes continuous capital investments centered on its railway business, which are largely funded by debt financing and the issuance of corporate bonds. Interest rate fluctuations and changes in the Company's ratings could affect earnings and financial conditions of the Group.

### (d) Significant Litigation

No significant lawsuit is pending against the Company. However, the Company may be subject to litigation and other legal measures from third parties as well as administrative investigation in the ordinary course of business. In addition to the burden of responding to these issues, if judgments and decisions that are unfavorable to the Company are made, business results and financial conditions of the Group may be adversely affected.

# NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

March 31, 2016 and 2017

## NOTE 1 | FRAMEWORK FOR PREPARING THE CONSOLIDATED STATEMENTS

### (1) Basis of presentation

The accompanying consolidated financial statements of Odakyu Electric Railway Co., Ltd. (the "Company") and consolidated subsidiaries (together, the "Group") are prepared on the basis of accounting principles generally accepted in Japan, which differ in certain respects as to the application and disclosure requirements of International Financial Reporting Standards, and have been compiled from the consolidated financial statements prepared by the Company as required by the Financial Instruments and Exchange Act of Japan.

### (2) U.S. dollar amounts

The Company and its domestic consolidated subsidiaries and affiliates maintain their books of account and other records in yen. The U.S. dollar amounts are included solely for convenience and are stated as a matter of arithmetical computation only at U.S.\$1.00=¥111.34, the approximate exchange rate prevailing on March 31, 2017. This translation should not be construed as a representation that the yen amounts actually represent, or have been, or could be, converted into U.S. dollars at the above or any other rate.

## NOTE 2 | BASIS OF PREPARATION OF THE CONSOLIDATED FINANCIAL STATEMENTS

### (1) Scope of consolidation

(a) Number of consolidated subsidiaries: 44

Primary consolidated subsidiaries include Odakyu Department Store Co., Ltd., Odakyu Shoji Co., Ltd. and Odakyu Real Estate Co., Ltd.

Odakyu Life Associate Co., Ltd. has been excluded from the scope of consolidation because the sale of its stock resulted in the loss of its status as a subsidiary on July 1, 2016. The statements of income of the company were consolidated until exclusion from the scope of consolidation.

Okinawa UDS Co., Ltd. was established on October 3, 2016, and has been included in the scope of consolidation from the fiscal year ended March 31, 2017.

(b) Name of major non-consolidated subsidiaries

Fuji Oyama Golf Club Co., Ltd.

The non-consolidated subsidiaries are all small in scale and not material when measured by the impact of total amounts of assets, net sales, net income attributable to owners of the parent, and retained earnings (based on the Company's ownership percentage) of these companies in the consolidated financial statements. They have therefore been excluded from the scope of consolidation.

### (2) Application of the equity method

(a) Number of affiliates accounted for under the equity method: 2  
Kanagawa Chuo Kotsu Co., Ltd. and Shirohato Co., Ltd.

Shirohato Co., Ltd. has been accounted for under the equity method from the fiscal year ended March 31, 2017 as a result of acquisition of its shares in November 2016.

(b) Oyama Kanko Dentetsu Co., Ltd. and other non-consolidated subsidiaries and other affiliated company have not been accounted for under the equity method because the impact of net income and retained earnings (based on the Company's ownership percentage) of these companies are all small amounts and not material proportionate to the net income attributable to owners of the parent and consolidated retained earnings.

(c) Of the affiliates accounted for under the equity method, the fiscal year end date of Shirohato Co., Ltd. is different from the consolidated fiscal year end date. In preparing the consolidated financial statements, the Company uses the financial statements of Shirohato's fiscal year end date.

### (3) Fiscal year-end of consolidated subsidiaries

The fiscal year-end of seven consolidated subsidiaries differs from that of the Company. The fiscal year-end of UDS Co., Ltd. and Okinawa UDS Co., Ltd. is the end of December, and that of Odakyu Department Store Co., Ltd., Odakyu Shoji Co., Ltd., Odakyu Shokuhin Co., Ltd., Hokuo Tokyo Co., Ltd. and Odakyu Department Service Co., Ltd. is the end of February. The financial statements of these subsidiaries have been consolidated with appropriate adjustments for the intervening transactions and events between the end of the fiscal years of these subsidiaries and the end of the consolidated fiscal year.

### (4) Summary of significant account policies

(a) Valuation standards and methods for significant assets

(I) Securities

① Held-to-maturity debt securities

Held-to-maturity debt securities are stated at amortized cost (straight-line method).

② Other securities

Marketable available-for-sale securities

Marketable available-for-sale securities are stated at market value based on market prices, etc. (unrealized valuation gains or losses are calculated by directly charged or credited method to net assets, while the cost of securities sold is calculated by the moving average method).

Non-marketable available-for-sale securities

Non-marketable available-for-sale securities are stated at cost using moving average method.

The Company records investments in limited liability investment partnerships, which are deemed "investments securities" under the provisions set forth in Article 2-2 of the Financial Instruments and Exchange Act of Japan, at the amount

equivalent to its own percentage in the assets of such partnerships, based on the most recent financial statements available depending on the report date stipulated in the partnership agreement.

(II) Inventories

Inventories are stated at cost using (the balance-sheet value is calculated reflecting the write-down due to a decline in profitability).

- Real estate development for sale,  
work in process.....The identified cost method
- Other inventories.....Principally, the retail cost method

(b) Depreciation and amortization methods for significant depreciable assets

(I) Property and equipment (excluding lease assets)

Property and equipment is stated generally at cost. Depreciation is calculated primarily by the declining-balance method except for buildings (excluding ancillary facilities) for which depreciation is calculated principally based on the straight-line method.

Principle useful lives of depreciable assets are as follows:

- Buildings and structures.....3 to 60 years
- Machinery, equipment, rolling stock,  
and other vehicles.....3 to 17 years

(II) Intangible fixed assets (excluding lease assets)

Intangible assets are amortized by the straight-line method.

Software for internal use is amortized by the straight-line method over their estimated internal useful lives (five years for the cost of software).

(III) Lease assets

Lease assets pertaining to finance lease transactions other than those where leases are deemed to transfer ownership of leased property to the lessee are valued by the straight-line method with the zero residual value over the term of the lease, which is deemed the useful life.

(c) Accounting standards for significant allowances and provisions

(I) Allowance for doubtful accounts

An allowance for doubtful accounts is provided based on the Company's and its consolidated subsidiaries' historical experience with respect to write-offs and based on an estimate of the amount of specific uncollectible accounts.

(II) Provision for bonuses

The Company provides for allowance for bonus based on the estimated amount of the payment for employees.

(III) Allowance for unredeemed gift certificates and others

The Company books expected use of unredeemed gift certificates and travel coupons, etc., to an allowance for unredeemed gift certificates and coupons, etc.

(d) Method of railway business construction fund

The Group receives a portion of the construction costs applicable to work undertaken to elevate railway lines and crossings and for the improvement of grade crossings in the form of a construction fund provided by local and other public authorities.

Upon completion of construction, an amount equivalent to the construction fund is recorded as a deduction from the acquisition costs of the property and equipment purchased.

In addition, the construction fund portion received is recorded in extraordinary income as "gain on railway business construction fund" in the consolidated statements of income. The corresponding amount recorded as a deduction from the acquisition costs of property and equipment purchased is posted to extraordinary losses in the accompanying consolidated statements of income.

(e) Method of accounting for retirement benefits

(I) Attribution of estimated retirement benefits

To calculate benefit liabilities, the estimated amount of retirement benefits is attributed to the consolidated fiscal year based on the straight-line attribution method.

(II) Treatment of unrecognized actuarial differences and past service costs

Past service costs are posted in expenses based on the straight-line method for a fixed period of years (10 years) within the average remaining service years of employees when costs accrue from their service.

Actuarial differences are posted in expenses after the consolidated fiscal year following their accruals based on the declining-balance method for a fixed period of years (10 years) within the average remaining service years of employees.

(f) Accounting standards for revenue and expenses

(I) Finance lease revenue

Finance lease revenue and related expenses of revenue are recorded when the lease payment is received.

(II) Completed construction

With regard to the accounting standard for construction revenue and construction costs, the percentage-of-completion method (the rate of completion of a construction project is estimated using the cost-comparison method) is applied to a construction work if the outcome of the construction activity is deemed certain for the progress made by the end of the year otherwise the completed-contract method is applied.

(g) Principal methods of hedge accounting

(I) Method of hedge accounting

Hedging activities are principally accounted for under the deferral hedge accounting. Exceptional accounting is applied for interest-rate swaps that meet their respective requirements.

(II) Hedging instruments and hedged items

- ① Hedging instruments: Interest-rate swap agreements
- ② Hedged items: Interest expense on borrowings

(III) Hedge policy

The derivative transactions are executed in accordance with the resolution of the Fund Handling Department upon receiving approval from the individual responsible for settlements.

(IV) Method for evaluation of hedge effectiveness

The Company evaluates hedge effectiveness by comparing the cumulative changes in cash flows or changes in the fair value of the hedged items, and the cumulative changes in cash flows or the changes in fair value of hedging instruments during the period from commencement of hedging to the point of evaluating effectiveness, based on changes in both amount and others. As for interest-rate swap agreements meeting the requirement for certain hedging criteria, the evaluation of hedge effectiveness is omitted as changes in the cash flow from fluctuation in interest rates are expected to be completely offset.

(h) Method and term of amortization of goodwill

Goodwill is amortized over period of mainly five years on a straight-line basis.

(i) Scope of cash and cash equivalents in the consolidated statements of cash flows

Cash and cash equivalents consist of cash on hand, demand deposits, and short-term, highly liquid investments with maturities of three months and minimal risk of change in value.

(j) Other basic significant matters for preparation of consolidated financial statements

(I) Accounting for consumption taxes

Accounting for consumption tax is based on the tax exclusion method.

(II) Method of including interest expenses in acquisition cost

Interest expenses related to certain long-term and large-scale real estate development for sale are included in acquisition cost. There are no transactions to be applied in the fiscal year ended March 31, 2017.

## NOTE 3 | CHANGES IN ACCOUNTING POLICIES

### Application of Practical Solution on a Change in Depreciation Method Due to Tax Reform 2016

Following the revision to the Corporation Tax Act, the Company and its certain domestic subsidiaries have applied the "Practical Solution on a Change in Depreciation Method Due to Tax Reform 2016" (ASBJ PITF No. 32, June 17, 2016), and changed the depreciation method for facilities

attached to buildings and structures acquired on or after April 1, 2016 from the declining balance method to the straight line method.

The effect of this on the consolidated financial results is immaterial.

## NOTE 4 | CHANGES IN PRESENTATION METHODS

### Consolidated Statements of Income

"Compensation for transfer" under "Non-Operating Expenses" in the previous consolidated fiscal year became less than 10% of the total amount of "Non-Operating Expenses" and thus is included in "Miscellaneous expenses" under "Non-Operating Expenses." Figures for the year ended March 31, 2016 are reclassified to reflect this change in presentation method.

As a result, ¥1,873 million presented in "Compensation for transfer" under "Non-Operating Expenses" in the previous consolidated fiscal year has been reclassified in "Miscellaneous expenses."

## NOTE 5 | ADDITIONAL INFORMATION

### Application of Revised Implementation Guidance on Recoverability of Deferred Tax Assets

The "Revised Implementation Guidance on Recoverability of

Deferred Tax Assets" (ASBJ Guidance No. 26, March 28, 2016) has been applied from the fiscal year ended March 31, 2017.

#### (7) Reserve for land revaluation

Two consolidated subsidiaries, Odakyu Real Estate Co., Ltd. and Odakyu Shoji Co., Ltd., revaluated land for business use based on the Law Concerning Revaluations of Land (Law No. 34, promulgated on March 31, 1998 and Law No. 24, promulgated on March 31, 1999). Of the valuation differences identified as a result of this, the consolidated subsidiaries recorded the amount corresponding to the taxes on the valuation difference in the liability section as "Deferred tax liabilities related to land revaluation." The amount remaining after subtracting these was recorded in the net assets section as "Reserve for land revaluation."

- (a) Odakyu Real Estate Co., Ltd.

- (i) Revaluation method

The Revaluation was performed by adjusting the road rating pursuant to Article 2, Paragraph 4 of the Enforcement Ordinance for the Law Concerning Revaluation Reserve for Land (Law No. 119, proclaimed on March 31, 1998). Where the road rating is not provided, adjusted valuation of real estate tax prescribed in Article 2, Paragraph 5 of the Law was used.

(b) Background to the recognition of a loss on impairment of fixed assets  
The fixed assets groups that are no longer expected earnings as initial projected or for which a decision for dismantlement has been taken, are recognized as a loss on impairment of fixed assets.

(c) Method of grouping assets  
The Group bases its grouping for assessing impairment losses on its business segments or on an individual property and store basis.

(d) Method of determining the recoverable value  
The recoverable values of assets are measured at their estimated selling value, which is principally equivalent to the valuation submitted by real estate appraisers. When the recoverable values are measured at their value in use, a discount rate of 4.0% is used for the computation of present value of future cash flows for the assets.

### (3) Sub-lease transaction

With regard to sub-lease transaction, due to little material significance, information concerning finance lease transactions is omitted.

## NOTE 12 | FINANCIAL INSTRUMENTS

### (1) Matters regarding the conditions of financial instruments

#### (a) Policies on financial instruments

It is the policy of the Group to limit its fund management to safe and highly liquid deposits while raising funds primarily through loans from financial institutions and the issuance of corporate bonds in view of the market climate and interest-rate trends. Derivatives are utilized for hedging against the risks described below, not for speculative purposes.

#### (b) Qualitative information (risks and risk management system) on financial instruments

Trade receivables, which are operating receivables, are exposed to credit risk of customers. In regard to the credit risk, the business management departments of each business unit periodically monitor the status of collection of trade receivables by each customer, manage due dates and balances of trade receivables, and identify and mitigate the default risk of customers at an early stage.

Investment securities are mainly equities acquired in connection with business and are exposed to volatility risks of their market prices. The monitored fair values are reported periodically to the Board of Directors.

Accounts payable, which are operating liabilities, are mostly due within one year.

Borrowings and corporate bonds are intended to procure funds necessary mainly for capital investments and working capital.

Borrowings with floating interest rates are exposed to interest-rate fluctuation risk. The long-term portions of borrowings are utilized as derivative transactions (interest-rate swaps) to hedge the risks. These derivative transactions are utilized for every individual agreement to convert variable interest rates on borrowings to fixed interest rates. As for interest-rate swap agreements meeting certain hedging criteria, the evaluation of hedge effectiveness is omitted.

In addition, the borrowings and account payable are exposed to liquidity risks. The Group manages liquidity risks in such a manner that each group company makes and updates its cash flow management plan on a monthly basis.

#### (c) Supplemental information on fair values

The fair values of financial instruments are calculated based on market prices, or by using reasonable estimates when market prices are no available. These estimates include variable factors, and are subject to fluctuation due to changes in the underlying assumptions. The contract amounts of the derivatives discussed in Note 14, "Derivative Financial Instruments" below are not an indicator of the market risk associated with derivative transactions.

### (2) Matters regarding fair values of financial instruments

Book value, fair value and the differences between them as of the end of the previous fiscal year and fiscal year under review are as shown below. (It excludes those whose fair values were difficult to determine. Please see Note 2.)

\*1. Corporate bonds include its redemptions due within one year.

\*2. Long-term loans include a current portion of long-term debts.

\*3. Long-term liabilities incurred for purchase of railway transport facilities includes its repayments due within one year.

**Note 1. Calculation method of fair values of financial instruments**

- (1) Cash and time deposits and (2) Notes and accounts receivable  
The book values of cash and time deposits and trade receivables approximate fair value because of their short maturities.
- (3) Investment securities  
The fair values of stocks are determined using the quoted price at the stock exchange, while the fair values of receivables are determined using the quoted price at the stock exchange or the quoted price obtained from the financial institutions. Regarding notes to securities according to holding purposes, refer to Note 13, "Securities."
- (4) Notes and accounts payable and (5) short-term loans  
The book values of accounts payable and short-term loans approximate fair value because of their short maturities.
- (6) Corporate bonds  
The fair value of corporate bonds is based on the quoted market price.
- (7) Long-term loans  
For long-term loans, fair value is determined by discounting

the total amount of principal and interest at the assumed interest rate on new loans of the same type. Long-term loans with floating interest rates are subject to interest-rate swap exceptional procedures, and, therefore, the fair value is determined by discounting the total amount of interest and principal together with the interest-rate swap at the interest rate assumed in a reasonable manner for new loans of the same type.

- (8) Long-term liabilities incurred for purchase of railway transport facilities  
The book value of long-term liabilities incurred for purchase of railway transport facilities approximates fair value because the fair values of floating-rate long-term debts reflect market interest rates within a short period of time.
- (9) Derivatives  
Please see Note 14, "Derivative Financial Instruments," for information on derivative transactions.

**Note 2. The book value of financial instruments whose fair value is extremely difficult to ascertain**

## NOTE 17 | LEASING REAL ESTATE

The Company and certain consolidated subsidiaries own leasing commercial facilities and leasing office buildings centering on the area around Tokyo and Kanagawa prefectures. As real estate of which some portions are used as leasing property includes portions used by the Company and certain consolidated subsidiaries, it is shown as "Other properties used as leasing properties."

The book values in the consolidated balance sheets, changes during the fiscal under review and fair values of real estate, of which some portions are used as leasing property, are determined as follows.

### (I) Fair value of leasing and other properties

- Notes: 1. The amount posted in the consolidated balance sheet is calculated by deducting the accumulated depreciation and amortization, and the accumulated loss on impairment of fixed assets from the acquisition cost.
2. For the year ended March 31, 2016, the main component of the increase is ¥6,559 million due to the factor that some of facilities that have been leased between the consolidated companies were leased out externally, and the decrease was due to depreciation and amortization. For the year ended March 31, 2017, the main factors attributable to the increase are ¥8,564 million (\$76,918 thousand) due to acquisition of land and building in front of Machida station and ¥3,608 million (\$32,401 thousand) due to acquisition of land and building in front of Shinyurigaoka station.
3. The market value as of end of the fiscal year is based, for main properties, on a real estate survey report prepared by a certified real estate appraiser, and for other properties, on appraised value or price index considered to reflect the fair value.

## NOTE 18 | SEGMENT INFORMATION

### (I) Segment information

#### (a) Overview of the reportable segments

The Group's reportable segments are determined on the basis that separate financial information for such segments is available and examined periodically by the Board of Directors, which makes decisions regarding the allocation of management resources and assesses the business performances of such segments.

The Group's businesses provide goods and services that support our customers' daily lives primarily along the Odakyu lines, centered on transportation but including merchandising, real estate, hotel, restaurant and other services.

For this reason, the Group consists of business segments with the business department as the basis. The three reportable segments are "transportation," "merchandising," and "real estate."

The main goods and services that fall under these reportable segments are listed below.

Transportation...Railway, bus, taxi, sightseeing boat, ropeway, etc.

Merchandising...Department store, supermarket, etc.

Real estate.....Sale of land and buildings, leasing of buildings, etc.

#### (b) Valuation method for reportable operating income (loss) and asset amounts

The accounting method for reportable business segments is presented in accordance with "Summary of Significant Accounting Policies" in Note 2. The reportable operating income figures are based on operating income. Intersegment transactions are presented based on the current market prices at the time of this report.

(d) Adjustment for increase in property and equipment and intangible assets amounting to negative ¥30 million (negative \$272 thousand) represents intersegment elimination.

3. "Segment income" is adjusted to operating income of consolidated statements of income.

4. "Depreciation and amortization," and "Increase in property and equipment and intangible assets" include additions to long-term prepaid expenses and its amortization.

## (2) Related information

### (a) Information by product and service

Since the segments of products and services are the same as the reportable segments, information by product or service is omitted.

### (b) Information by geographical area

#### (i) Revenue from operations

Since the revenues to external customers in Japan exceed 90% of the revenues from operations on the consolidated statements of income, the information is omitted.

#### (ii) Property and equipment

Since the amount of property and equipment located in Japan exceeds 90% of the amount of property and equipment recorded on the consolidated balance sheets, the information is omitted.

### (c) Information by major customer

Since sales to no customer account for 10% or more of the revenues from operations on the consolidated statements of income, information by major customer is omitted.

## (3) Loss on impairment of fixed assets by reportable segments

The description on the loss on impairment of fixed assets by segment for the years ended March 31, 2016 and 2017 is omitted because it is disclosed in "Segment information."

- Notes: 1. The “Average interest rate” of loans payable is the weighted average interest rate for outstanding loans payable as of end of the fiscal year under review.
2. The “Average interest rate” is not shown for lease obligations because the Company reported lease obligations before deducting interest in the consolidated balance sheets. The lease obligations exclude the amounts in sublease obligations.
3. The amounts in brackets in “Long-term liabilities incurred for purchase of railway transport facilities” in the “Other interest-bearing debt” column are the current portion of the total amount and are included in “Other” of current liabilities on the consolidated balance sheets. The long-term liabilities incurred for purchase of railway transport facilities are loan of its buying railway facilities from the Japan Railway Construction, Transport and Technology Agency. The above amounts are equivalent sum of figures of the consolidated balance sheets that removed consumption taxes.
4. The “In-house deposits” are included in “Other” of current liabilities on the consolidated balance sheets.
5. The repayment schedule of “Long-term loans (excluding current portion),” “Lease obligations (excluding current portion)” and “Long-term liabilities incurred for purchase of railway transport facilities” for five years subsequent to March 31, 2017 is as follows: The following table excludes the payment schedule of in-house deposits because the repayment period is not defined.
