[Disclosure Based on the Principles of the Corporate Governance Code] Updated

Principle 1.4 Strategic Shareholdings

The Company considers it necessary to maintain and develop business relations with various companies in order to achieve the Group Management Principle of helping its customers create “irreplaceable times” and “rich and comfortable lifestyles.” To this end, the Company holds shares that are deemed necessary as a policy based on comprehensive consideration of factors such as business relationships with the issuing company. With regard to strategic shareholdings held by the Company, the Board of Directors annually verifies the aim and rationale of holding from a qualitative perspective, such as contribution to the maintenance and development of business relations with the issuing company, as well as from a quantitative perspective such as cost of capital and dividend income. Our policy calls for reducing shares for which the significance of holding has diminished through sale and other means as a result of such verification.

The Company also exercises the voting rights on strategic shareholdings for all proposals. In exercising the voting rights, the Company pays special attention to proposals that may damage shareholder value in accordance with the Company’s standards for exercising voting rights based on factors such as the business condition, dividend condition and presence or absence of anti-social acts and other scandals of each company. In addition, the Company receives an explanation of the proposal from the issuing company as necessary.

Supplementary Principle 1.4.1 Response to Cases Where Companies Holding the Company’s Shares as Strategic Shareholdings Indicate Their Intentions to Sell These Shares

The Company will not imply a possible reduction of business transactions and the like for the purpose of hindering the sale of the Company’s shares held by shareholders who hold them as strategic shareholdings.

Principle 1.7 Related Party Transactions

At the Company, competing transactions and conflict-of-interest transactions by Directors are specified as proposals to be resolved by the Board of Directors under the Regulations of the Board of Directors. In addition to this, transactions between the Company or its consolidated subsidiaries and officers and their close relatives are also verified to determine the presence of any such transactions and their details every fiscal year, while the details of transactions that fall under the accounting standards and the guidelines for the application of such standards for related party disclosure are disclosed.

By receiving advice on pension fund management from R&I from a neutral and fair position, the Company has a system that does not allow conflicts of interest to arise between pension fund beneficiaries and the Company.

5. Other Special Circumstances which may have Material Impact on Corporate Governance

The Odakyu Group Management Principle calls for “helping its customers create ‘irreplaceable times’ and ‘rich and comfortable lifestyles’.” In order to realize this management principle, the Company has formulated the Management Vision “UPDATE Odakyu—Becoming a Community-Based Value Creation Company,” which indicates the direction to be taken by the Group by the fiscal year ending March 31, 2027, and the Medium-Term Management Plan, which spans a period of three fiscal years, to materialize this vision. Based on the above, each Group company formulates a medium-term management plan and steadily fulfills their respective roles, while also striving to improve corporate value by maximizing future cash flows through cooperation within the Group.

Under the above policy, Shirohato Co., Ltd., a listed subsidiary of the Company, is expanding its earnings scale as a company that specializes in the innerwear e-commerce business even before becoming a subsidiary of the Company. For the Group whose customer touchpoints are mainly offline channels, the expertise and know-how of the said subsidiary regarding online sales are recognized as valuable management resources.

As the said subsidiary has seen effects of listing such as reflection of various opinions obtained from many shareholders in its management and increases in public name recognition and credit capability, the Company believes that listing will lead to further development of the said subsidiary.

Although the Company dispatches Directors to the said subsidiary, in principle, the Company respects the judgements of the said subsidiary’s management team. The said subsidiary strives to ensure that there will be no activities that will unfairly damage the interests of shareholders of the subsidiary besides the Company or other stakeholders.

Policy on Determining Remuneration Amounts and Calculation Methods <u>Updated</u>	Established
---	-------------

Disclosure of Policy on Determining Remuneration Amounts and Calculation Methods

Compensation for Directors concurrently serving as Executive Officers is determined by the role-linked compensation, determined in accordance with position, in addition to the compensation plan linked to business

performance per fiscal year, determined based on certain standards including sales growth rate, adjusted for the status of each Director's achievement of targets, and stock compensation plan with stronger linkage with the shareholder value that uses a trust to provide incentives for improving business performance over the long term. In addition, the ratio of the performance-linked compensation to the total amount of compensation will be set to increase as the position rises.

Compensation for Directors not concurrently serving as Executive Officers (Outside Directors, etc.) is determined only by the role-linked compensation in light of the fact that their major role is management supervising function.

With regard to the performance-linked compensation, 75% of the criteria for determining the performance appraisal that forms the basis for calculation is qualitative targets and 25% is quantitative targets. Qualitative targets set out individual issues from a management standpoint from a medium- to long-term perspective, while quantitative targets are set according to four consolidated performance indicators (sales growth rate, EBITDA growth ratio, adjusted ROA, and EPS) from a Group management perspective, and based on these, the evaluation results of the achievement levels for each fiscal year are reflected in the amount of compensation.

The role-linked compensation and the performance-linked compensation are paid regularly while Directors are in office. Shares of the Company and cash based on the stock compensation plan that uses a trust are granted at the time of retirement, in principle.

Stock compensation that uses a trust is determined in accordance with the position. In the event that a recipient of stock compensation is dismissed or resigns from his/her office as Director due to damages he/she caused to the Company or in other similar cases, all or part of granted beneficiary rights to shares of the Company will be invalidated by a resolution of the Board of Directors.

Remuneration amounts for individual Directors are deliberated at the Nomination and Compensation Advisory Committee by comprehensively considering this basic policy, general norms, etc., and the results thereof are reported to the Board of Directors. The Board of Directors resolves to leave the matter to Representative Director on the premise of payment of the amounts in line with the report of the Nomination and Compensation Advisory Committee on remuneration amounts for individual Directors.

* The Company amended the basic policy on determining director remuneration as of June 29, 2022 by resolution of a meeting of the Board of Directors held on May 24, 2022 as follows. However, remuneration, etc. for the fiscal year under review was paid based on the basic policy prior to the amendment.

(Following the amendment as of June 29, 2022)

Compensation for Directors concurrently serving as Executive Officers consists of the fixed compensation, determined in accordance with position, in addition to the performance-linked compensation, determined based on certain standards including consolidated operating income, adjusted for the status of each Director's achievement of targets, and stock compensation plan with stronger linkage with the shareholder value that uses a trust to provide incentives for improving business performance over the long term. The ratio of the performance-linked compensation to the total amount of compensation will be set to increase as the position rises and in the case of the President & CEO, is approximately 30%.

Compensation for Directors not concurrently serving as Executive Officers (Outside Directors, etc.) is determined only by the fixed compensation in light of the fact that their major role is management supervising function.

With regard to the performance-linked compensation, 70% of the criteria for determining the performance evaluation that forms the basis for calculation is quantitative target evaluations and 30% is qualitative target evaluations. Evaluations of quantitative targets are determined based on achievement levels for each fiscal year regarding consolidated performance indicators (consolidated operating income and consolidated operating income margin) established from a Group management perspective, and indicators according to the roles of each Director. Evaluations of qualitative targets are determined based on achievement levels of individual issues established from a management standpoint from a medium- to long-term perspective. Performance-linked compensation is determined based on the final evaluations calculated according to the results of these evaluations. As a result of the final evaluations, performance-linked compensation will, in principle, fluctuate within a range of 0% to 200% of standard amount for each position.

Fixed compensation is paid regularly while Directors are in office. Performance-linked compensation is paid in a lump sum following the end of the fiscal year. Stock compensation that uses a trust are granted and paid as shares of the Company and cash at the time of retirement, in principle.

Stock compensation that uses a trust is determined in accordance with the position. In the event that a recipient of stock compensation is dismissed or resigns from his/her office as Director due to damages he/she caused

to the Company or in other similar cases, all or part of granted beneficiary rights to shares of the Company will be invalidated by a resolution of the Board of Directors.

Remuneration amounts for individual Directors are deliberated at the Nomination and Compensation Advisory Committee by comprehensively considering this basic policy, general norms, etc., and the results thereof are reported to the Board of Directors.

The Board of Directors resolves to leave the matter to Representative Director on the premise of payment of the amounts in line with the report of the Nomination and Compensation Advisory Committee on remuneration amounts for individual Directors.

Supplementary Explanation

The basic policies on parties desirable to control determination of the Company's finance and business policies are as follows:

(1) Details of basic policies

Regarding the shares of the Company, which is a public company, the Company believes that, so long as shareholders and investors are allowed to freely trade such shares, the decision on parties desirable to control determination of the Company's finance and business policies should ultimately be based on the collective will of the shareholders, and the decision on whether or not to accept a large-scale purchase by a specific party and sell the Company shares should ultimately be left to the discretion of the Company's shareholders.

However, among large-scale purchases of shares, there are some purchases which do not contribute to the corporate value of the Company or the common interests of shareholders, including those with a purpose that would obviously undermine the corporate value and common interests of shareholders mainly through the sale of important operating assets, those with the potential to coerce shareholders into accepting the purchase, and those where information needed by shareholders to make the best choice is not sufficiently provided.

(3) Initiatives to prevent a party who is deemed inappropriate in light of the basic policies from controlling determination of the Company's finance and business policies

The Board of Directors of the Company takes all possible measures to the extent permitted by the Financial Instruments and Exchange Act, the Companies Act and other relevant laws and regulations. These measures include requesting the party attempting to make large-scale purchases of the Company shares to provide adequate information required by shareholders to make appropriate decisions, evaluating and studying such information, followed by disclosing, among other things, the opinions of the Board of Directors of the Company, as well as negotiating with the large-scale purchaser as needed and working to secure the time needed by shareholders to consider this matter.

(4) Decisions of the Company's Board of Directors regarding the initiatives above and the reasons thereof

The measures to realize the long-term vision, reinforce safety measures in the transportation business, enhance quality of transport services, and enhance and reinforce corporate governance stated in (2) above were formulated as specific measures to continuously and sustainably ensure and enhance the corporate value of the Company and the common interests of shareholders, and truly contribute to the realization of the basic policies.

In addition, the initiatives stated in (3) above aim to ensure and enhance the corporate value of the Company and the common interests of shareholders in line with the basic policies through taking measures mainly to secure the information and time needed by shareholders to determine whether or not to accept the large-scale purchase of the Company shares when such purchase is made and to negotiate with such large-scale purchaser for the sake of shareholders.

As such, the Board of Directors of the Company holds the view that the initiatives mentioned in b) and c) above do not undermine the common interests of shareholders of the Company and are not for the purpose of maintaining the positions of the Company's officers.
